10.1.1 Remove Punctuations from a String

ALGORITHM

1. **Start**
2. **Input a string text**
3. **Initialize an empty string**
   → result ← ""
4. **For each character char in text, do:**
   - **Check if char is alphanumeric OR space**
     - **If YES → add char to result**
       → result ← result + char
     - **If NO → ignore the character**
5. **Display result**
6. **Stop**

10.1.1. Remove Punctuations from a String 06:49

Write a Python program to remove all punctuation marks from a given string and print the resulting string.

Punctuation marks are special characters that are not letters, digits, or spaces.

The program should keep all letters (uppercase and lowercase), digits, and spaces, but remove all punctuation marks.

Input Format:

- Single line contains a string (may include letters, digits, spaces, and punctuation marks).

Output Format:

- Print the string after removing all punctuation marks.

Note:

- Refer to sample test cases for better understanding.

Explorer

removeP... Submit

```
inp = input()
new_str =""
for ch in inp:
    if ch.isalnum() or ch.isspace():
        new_str=new_str+ch
print(new_str)
```

Debugger

Average time 0.002 s 2.25 ms

Maximum time 0.004 s 4.00 ms

4 out of 4 shown test case(s) passed
